Pet-Atlas Application

- As simple as any pet owner can use it without complications or confusion
- IOS/Android
- Linked and Synchronized with the website and should reflect any activity automatically
- Anyone can use the application but only the subscribers have the access to the community
- The community part should look like the WhatsApp – for the sake of customer peace and comfortability.
- The subscription part includes (Vet chat + Offers/Discounts)
- The subscription should be set on Auto-renewal ; means that once the customer subscribe first time, the deduction of the cost amount should be automatically deducted from the customer bank account and the customer doesn't have to renew it by him/her self manually…Exactly like (Youtube premium subscription) and once the client cancel the subscription or the process of the payment failed, the access of the community should be removed but still have access to the rest of the items on the application.
- The application is dual language (Arabic and English)
- In the Pet-Atlas Community :-
- Communication in the community will be through texting, sending voice messages and recording videos only (No direct calls)
- Announcement group for only announcements and members don't have access to interact or comment.
- Community group for all the members and vet account to interact, comment,..etc
- Vet Chat Account is the consultant/Vet account where all the members can text, send videos and voice messages directly anytime with no appointments.
- The access of Vet Chat Account can be given and opened from multiple different places at the same time.

- An admin account/Owner have all the access/full control of the app and have the access to monitor and see the chats between the vet account and the members for supervision and quality work.
- The admin can see how many vet chat account and timming logged in & Out.
- The admin account can create an account and give specific access to some team members like the operation manager, technical team, Editor,..etc but not having the full access as the admin account.
- The admin account has the right to remove a specific member from the community or directly add a member without paying or providing a code that offers 0 payment upon subscription.
- The Themes, tones, style branding of the application should be the same as the website.
- Providing the Source code
